

ABSTRACT OF THE DISCLOSURE

1
2 A decorative external curtain assembly is disclosed for applying decorative fabric
3 material to an external facade of a building, the assembly comprising: a sheet of
4 fabric material having top and bottom edges: and complementary engageable
5 fastener strips respectively affixed to the sheet of fabric material and the external
6 façade of the building for fastening at least one edge of the fabric material to the
7 external façade of the building. The engageable fastener strips are preferably
8 made of Velcro Tape having co-acting miniature hooks and loops formed of
9 relatively rigid filament material for fastening the fabric material to the external
10 façade of the building.
